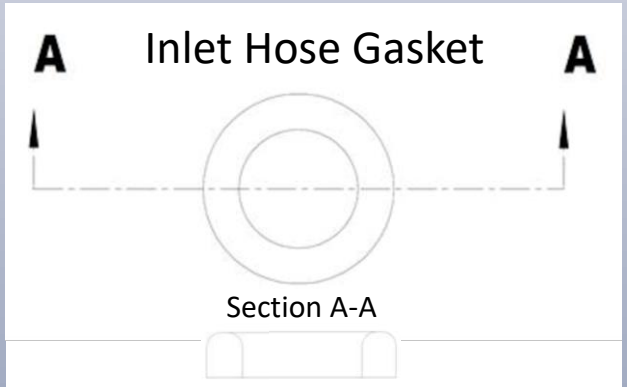
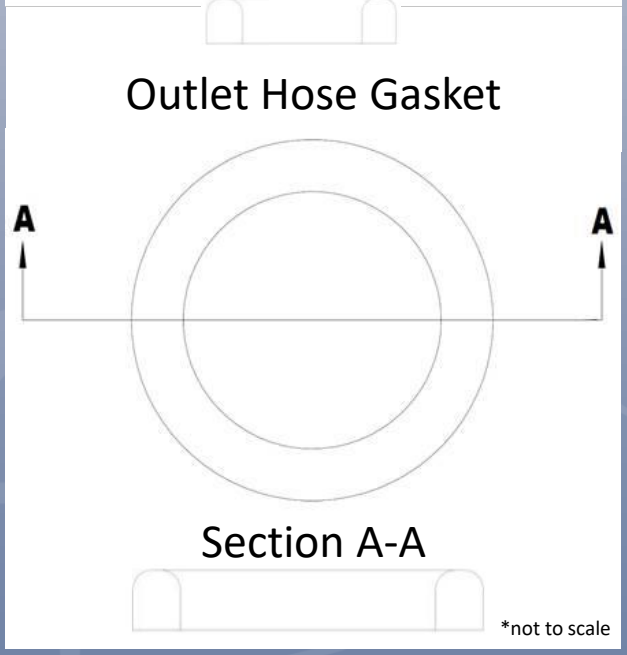
RUBBER & PLASTICS CO., INC

PANACEA® Advanced

NBZ Replacement Hose Gaskets

Prince's Hose gaskets are made with Prince's unique 6962 Special EPDM, which offers excellent sealing ability and corrosion-resistance. **Hose gasket life regularly achieves the life of the electrolyzer membrane**, *even without Teflon® armor*, for users globally.





Gasket Suggested Torque Specs:

- 30 N*m for Inlet
- 35 N*m for Outlet Hoses
- Easy-to-seal Curved Gasket Face lowers the bolt torque required to make a reliable seal. The curved gasket portion, when installed, faces the hose flange.
