

PANACEA® P-72 Thermoplastic **Manifold Headers**

Material Advantages

P-72 is a High-Temperature Resistant Thermoplastic, Excelling in All Chlor-Alkali Services

- P-72 has a low thermal expansion coefficient, is resistant to 100°C, is easily fabricated, is stress-relieved (annealed). Pipe socket joints are reliably solvent welded.
- Some P-72 anolyte process piping has lasted nearly 30 years in continuous service!
- Available Pipe Sizes up to 12" (≈DN-300)

RUBBER & PLASTICS CO., INC

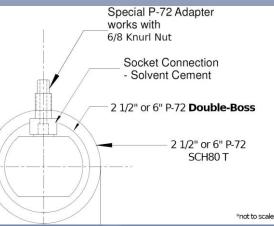

• Please refer to Prince P-72 Literature, for more product details and specifications.

Inlet Manifold Headers

P-72 Header's Unique Extra-Thick Pipe Wall

- Accomplished with: Double-Boss (per photos and diagram) or Schedule 120 Pipe
- · Significantly increases surface area of the solvent weld within the socket (especially the Double-Boss design), improving reliability.
- Please consult Prince for available sizes.
- CNC-machined tapered socket establishes a mechanical seal within each joint

P-72 Nozzle Tapered Socket

PANACEA[®] P-72 Thermoplastic Manifold Headers

Inlet Manifold Headers

- Among many other header types, Prince has made hundreds of Double-Boss inlet headers for **Uhde users** globally, with many years of success.
- The headers have *flanged* vent valves (with our 6962 Special EPDM gasket) that have proven to be a more reliable design than OEM single-piece welded alternatives. The header vent valve neck is supported with solvent-welded gussets, for additional stability and resistance to torsion exerted by operators during vent valve use.

PANACEA® P-72 Thermoplastic Manifold Headers

Inlet Manifold Headers

P-72 Base Flange Face with *Galvanized Steel Backing Ring

*Note: Backing Rings are also available in PP-encapsulated Steel, as a more cost-effective alternative, while still being corrosion-resistant.

Solvent Socket Weld, Establishing Homogeneous P-72 Material

Discharge Manifold Headers

FRP binds reliably to P-72, while other thermoplastic liners are prone to delaminate from FRP.

Solvent-Welded Nozzle, with PVDF Knurl Nut Threaded onto Nozzle
