

**60-Durometer Metal-Detectable SBR Compound, made  
with FDA-approved ingredients.**

Typical Physical Values		
Property	ASTM	Value
Durometer – Shore “A”	D2240	60±5
Tensile	D412-16	1600 psi 11 MPa
Elongation	D412-16	570%

- This material has been sensed with metal-detectors of others, down to 20 mm<sup>3</sup> size – more easily sensed than alternative rubber materials.
- Other than what is stated above, there are no warranties given, expressed or implied.
- Any user of this material should determine the suitability of the material for their own particular purposes.
